## SEHAL GREEN WALL SYSTEMS

The Future of Greening is Changing and is getting diversified in Vertical Gardening and Vertical Forests. The lack of space on ground, increasing urbanization and depleting air quality are the main reasons for increase in demand for vertical green walls in the life spaces. MEG India Team is ready with Future Ready Technologies and Have Best In Class Green Wall Modules Systems, Best Potting Mix and Scientific Selection of Plants to execute Vertical Green Walls. Our Green Wall Systems are Easy and Convenient to Handle, Self Watering sets it apart from existing conventional systems. Moreover it is Sustainable, Cost effective and Very Easy to Maintain.

The Installation of SEHAL Green Wall is easy and User Friendly and Helps in Crafting Bigger size Green Walls executions feasible. The Uniqueness and smart Engineering of SEHAL Green Walls Systems set it apart from existing/conventional system. We can take up any challenging jobs all over India.

## ADVANTAGES OF SEHAL VERTICAL GREEN WALL SYSTEMS

- Self standing Design. (Weight Management very Easy).
- Self watering/Self Fertigation (organic/Non residue/non toxic).
- Independent Water reservoir for each plant (250/360 ml).
- Excess water-Drain to avoid flooding in planter.
- No separate dripper required for each Pot/Plant.
- No blockage in irrigation due to free flow system.
- Fully Covered irrigation System/ Closed Drain (No evaporation loss).
- No Water Leakages / Less water usage (Per sqft-only 1-3 ltr)
- Sustainable and Engineered Potting Mix (organic and Non toxic).
- No loss of Potting Mix-Through Water and Mechanical means.
- Bigger Pot size to hold larger Plants and give best after effects for yrs.
- Convenient for transport and Installation.
- Low on weight-Per sqft wt. (Module+Media+Plant) Dry/wet: 2.5 kg/5 kg.
- Negligible/ No Welding (Less Carbon footprint system installation)
- Galvanized Steel Support Systems (rust free and long life).
- Fast and Easy:- 300 sqft can be installed per day
